The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/587,422	<b>Applicant(s)</b> SHEARER-ROBINSON, ABIGAIL	
	<b>Examiner</b> José V. Chen	<b>Art Unit</b> 3637	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 15(second occurrence) and 16 have been renumbered 16, 17 respectively.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 16, 17 (renumbered) are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 16-17 are indefinite in that they depend from article claim 14. It appears that the claims should depend from claim 15. Clarification and correction are required. For examination purposes, the claims have been treated as if they were dependent from claim 15.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3637

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over in view of Goldberg et al ('702) in view of Calton. The patent to Goldberg et al teaches structure substantially as claimed including support surface (10) and receptacle (80) , legs (50) the only difference being that the legs are not releasably attached to the top. However, the patent to Calton (figs. 1-2\_ teaches the use of releasable attachment between leg and table structure to provide knockdown capability. It would have been obvious at the time of the invention to modify the structure of Goldberg et al to include a releasable attachment of the legs, as taught by Calton, since such structures are conventional alternative structures used in the same intended purpose thereby providing structure as claimed. The method would have been obvious of the structures. The use of different well known hardware structures, such as cotter pins, nut and bolts, screws, nails which available at any hardware store, such as Home Depot, Lowes, such hardware structures used in the same well known intended purpose would have been obvious an well within the level of ordinary skill in the art and further reasonably predictable. Applicant is given Official notice of such.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references to Romano, Devitt, Duncan, Guidry, Menges et al, Wilbert, Glick et al, Bowman et al, Goldberg ('523), Caeton teach structure similar to applicant's.
